- Relevant Projects: Information Technology, SBA, and CXC Examination
- Awards: 1st in Information Technology and EDP&M.

SKILL

- Web Development- During my education, I went through a Web development course, which taught me about UI and UX design and considered considerations like accessibility and Human interaction. During this course, I also dealt with some PHP and implemented a database backend with a CRUD design.
- Mobile application development- During my studies, I went above and beyond what was required of me during the course by developing a mobile app along with my web app to demonstrate the possibilities of the application I made.
- I wanted to nurture this skill, as I wanted to learn how to edit photos. This comes very handy when you're doing web development and want to quickly edit pictures for a site to properly reflect your vision of what that space was made for.

OTHER SECTIONS

Computer Proficiency- 9/10 I have a high skill in being Proficient in Computers and a high willingness to learn even more in a real-world environment.

Technical Skills- 8.5/10

While I may be computer proficient, my technical skills need to be nurtured even more. While I may call myself a very technical person, I still have much more to learn.

Scientific Instruments- Servers, Computers, Networking Equipment

Languages-English

Programming Languages- C++, Python, PHP, Rust, JavaScript, Laravel, SQL

ACTIVITIES & INTERESTS

Activities

- Listening to music
- Playing computer games like Esports titles like CS2 and Marvel Rivals)
- Reading manga
- I love to travel to see new places

Interests

- Computer and Server management
- Computer and Small Electronics Repair
- Networking
- Programming

Most Recent Position Held

XML3, Corozal Town— junior web developer

June 2020 - December 2020

- This job entails fixing the UI of a pre-owned template given to me by the company by fixing the CSS and default text, and putting their images on the site.
- This was a self-funded project with friends

2nd Most Recent Position Held

EXE Productions — Concept artist, co-game developer

October 2021 - January 2023

- Deal with making some concept art for a Scrapped game.

- This project is done in my spare time with some of my friends.

3rd Most Recent Position Held

Financial Service Commission- Junior Technician

February 2022 - May 2022

- Assisted in the repair and maintenance of various electronic devices. Also led several small-scale technical projects, demonstrating initiative and problem-solving skills in a fast-paced environment.

4th Most Recent Position Held

c0deweb- software Developer

February 2025 - May 2025

The Position focuses on web/software development tasks using **Laravel Sail**. Key responsibilities have included setting up the development environment, reviewing the codebase, fixing CSS bugs, and updating the email design. The experience also offers insight into a Scandinavian work culture centered on **trust, autonomy, and flexibility**, providing a unique opportunity to grow technically and professionally while managing a significant time difference.
